

Boidushya Bhattacharyay

Product Engineer • Senior Frontend Engineer

[boidu.dev](#) hi@boidu.dev [x.com/boidushya](#) [github.com/boidushya](#) [linkedin.com/in/boidushya](#)

Experience	DFlow (acquired by MoonPay) Product Engineer Sep 2025 - Present	
	- Core engineer on DFlow’s Solana trading app: swaps, tokenized equities (xStocks, PreStocks), commodities and portfolio. Set up its UI foundation (Tailwind v4, Radix, Motion). - Built the DFlow Developer Portal frontend: Storybook component library, API key management, rate limits, team invites and admin tooling. The portal onboards developers to DFlow’s Trading API (\$50B+ volume, 500+ apps including Coinbase and Phantom).	
	Junction Exchange Founding Engineer, Lead Frontend Jan 2025 - Aug 2025	
	- Architected and built the core trading platform from zero to \$140M+ volume and 120k+ active users. - Built a cross-chain balance aggregator that unifies 6 ecosystems (Bitcoin, Litecoin, Dogecoin, Solana, EVM, Cosmos) in one portfolio view. - Owned “Junction Services” end to end (telemetry, email automation, quests). Led design engineering and micro-animations with the design team.	
	Camp Network Lead Frontend Engineer Apr 2024 - Dec 2024	
Projects	WalletConnect Frontend Engineer, then Developer Relations Feb 2023 - Apr 2024	
	- Built v2-migration-lab (v2 integration testing platform), eip6963.org (EIP-6963 reference) and create-wc-dapp (starter template). - Led the 2023 docs redesign.	
	Reef & Squid Full-stack & App Developer Dec 2021 - Jan 2023	
	Built Reefscan and the Reef web and mobile apps. Led frontend for Squid (10k+ peak visitors, 500+ active users) and built its spam/NSFW automoderator (98.7% accuracy).	
	Better Lyrics Ecosystem Open source Jun 2024 - Present	
Achievements	- Synced-lyrics ecosystem serving 270M+ requests/month to 400k+ daily unique visitors. Better Lyrics: Chrome extension for YouTube Music with 100k+ users. Top 10 in Chrome Web Store Entertainment and top 5 in Music, 4.9 rating, “Featured” badge. Rewrote the backend from TypeScript to Go, reducing server costs by up to 100x. Better Lyrics Shaders: animated album-art backgrounds for YouTube Music, built on Kawarp. Top 20 in Chrome Web Store Design. Unison: crowdsourced lyrics platform with submissions, voting, peer review and revision history. Passwordless “Sign in with Better Lyrics” uses ECDSA keys held by the extension. Includes a Rust language-detection service. Composer: offline-first PWA for authoring word-synced TTML lyrics, with in-browser stem separation, romanization and a Go/Wails desktop companion for YouTube audio.	
	Rang Color accuracy game 2024	
	Next.js color-matching game (16M+ colors). Went viral from 3+ reels by a color-focused Instagram creator: 250k+ daily impressions at peak, 50k+ players in month one.	
	Speaking	ETHOnline 2023 : talk on EIP-6963 (Ethereum Foundation) • HackTheLeague 2023 : speaker
	Hackathons	ETHIndia 2024 : Base, CoinDCX and Akave prizes • ETHIndia 2023 : 1st, Huddle01 Mobile Track • ETHIndia 2022 : Valist, ENS and Push Protocol prizes
Skills	Frontend	React, Next.js, TypeScript, JavaScript, Tailwind CSS, Radix, Motion, Three.js, WebGL, Figma
	Backend	Go, Node.js, Rust, Python, Elysia, Hono, PostgreSQL, Redis, REST APIs, Docker, GitHub Actions
	Platforms	Solana, EVM, WalletConnect, Chrome extensions, PWAs, Cloudflare Workers, Flutter
Education	B.Tech, Information Technology, Manipal University Jaipur 2020 - 2024
